Meeting Nov 15

I love how the aesthetics of the website turned out! The neon subheadings are an amazing addition, and really immerse me into the vaporwave aesthetic and movement. I also love the pixelated rockets that act as a transition between each section.

Suggestions:

- I think that the type could be a little smaller so that there is more room for it to breathe within content boxes
- Similarly i think the images have the opportunity to be bigger and closer to the outer bounds of the website

It looks good otherwise!
